
Your must have make-up item

Which make-up item is an absolute must for you that you can't live without?

Mine has to be mascara. If I don't wear any, I feel absolutely naked.

yes, you can have 2. I forgot to mention lipstick, as that is my other item I don't leave the house without.

I recently started using foundation from the body shop, but only at places where needed, not all over my face. I like foundation to be subtle, not that it looks like that it is caked on.

I got the bodyshop brushes, and I must say that they are amazing, for free because I had a bodyshop party in my house.

Good way to get some freebies :cheer:

That is a tricky one! I think maybe eye liner, mac do a great kohl pencil which I think is called smoulder. Also when I was getting introduced to my company arbonne (www.dawnjackson.myarbonne.co.uk) I tried their mineral foundation which I now can't live without! It goes on like powder but once on is a light, flawless foundation, fab!

Mac also do gerat blushers if anyone is looking!
